

The Archaeologist Volume 3

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1895 Excerpt: ...preference among the Eskimos for adzes in contra-distinction from the polished stone hatchets or the grooved stone axe is shown in the catalogue of the Eskimo collection in the U. S. National Museum, prepared by Lieut. T. Dix Bolles, U. S. Navy, Museum Report, 1887, p. 357. Eighty-six localities are represented in the catalogue, extending along the entire north and northwest coast. Eleven thousand, four hundred and fifty-two objects were catalogued representing three hundred and twenty-two different kinds. No axes or hatchets are reported while there were twenty adzes, two adzehandles, eighty-seven adze-blades and eleven adze-heads, with eight hammers and twenty-eight wedges. The same condition of culture seems to have prevailed all the way down the coast into lower California; no polished stone hatchets are found which can be identified as having been used axe-fashion. The grooved axes are practically the same. Prof. F. W. Putnam, in Wheelers Report, Vol. VII, of the U. S. Geographical Surveys, Archaeology, reports (page 203, Fig. 75) a large grooved axe identical in form with many of these found in the Atlantic States but which, so far as he is aware, is the first implement of this character found in California. It was made by pecking, hammering and polishing as are those on the Atlantic Coast. It was 10 inches in length, 3i in width and 1)4 in thickness. It had a cutting edge or point, a rounded head and a groove near the head extending all around. It was found by Mr. Schumacher in Pots Valley, St. Catalina Island, where the manufacture of steatite pots was carried on extensively. Prof. Putnam says: The surface (of the implement) was smooth and

greasy to the touch, which, taken in connection with the place where it was obtained, is pretty conclusi...
