

The Invisible Diggers: A Study of British Commercial Archaeology (HMP RESEARCH SERIES)

Since the increasing reliance on developers to fund archaeological work through the 1980s, and the implementation of Planning Policy Guidance Note 16 (PPG16) in 1990, British commercial archaeologists have become increasingly distanced from their academic colleagues. This monograph examines the situation within contemporary commercial archaeology and considers the challenges faced by those employed within that sector, including the impact of commercial working practices on pay and conditions of employment and the process of excavation and knowledge production. This monograph provides a fascinating insight into the working environment of commercial archaeologists and demonstrates how camaraderie and love of their job is often just enough to outweigh the adversity they face in the form of low wages, poor employment conditions and career prospects.
