This study used the qualitative research method utilizing historical data to investigate the ethical challenges that emerge through loyalty. American Revolutionary War patriot Benedict Arnold was used as a case study to highlight the relative and situational aspect of loyalty. Research uncovered in this study suggested that loyalty is often transactional in nature and that participants generally have selfish motives for engaging in loyalty-driven relationships. The results of this research show the strengths and weaknesses of loyalty and how it could be used to help facilitate individual and corporate productivity.
